

# Prescription Monitoring Program – NL

## Monitored Drug List

Last updated: October 2018

Monitored drugs are defined in the regulations of Prescription Monitoring Program - NL as opioids listed in **schedule 1 of the Controlled Drugs and Substances Act (Canada)** AND tramadol.

The following is a list of commonly used drugs that are captured by this definition.

**Note:** This is not an exhaustive list as new drugs, or newly-marketed brands of drugs, can become available at any time. If the medication being prescribed contains an opioid, it is subject to the requirements in the **Prescription Monitoring Act**.

Drug Name	Common Trade Names
<b>Buprenorphine</b>	<ul style="list-style-type: none"> <li>• Butrans</li> <li>• Suboxone</li> </ul>
